In case Unit holders do not provide their Demat Account details, an Account Statement shall be sent to them. Such investors will not be able to trade on the stock exchange till the holdings are converted in to demat form.

INVESTMENT OBJECTIVE -

The primary investment objective of the scheme is to seek to generate regular returns and growth of capital by investing in a diversified portfolio of: -

- Central and State Government securities and
- Other fixed income/ debt securities normally maturing in line with the time profile of the scheme with the objective of limiting interest rate volatility

ASSET ALLOCATION PATTERN OF THE SCHEME:

Asset Allocation: The anticipated asset allocation is as under:

Instruments	Asset Allocation		Risk Profile
	Minimum	Maximum	
Money Market instruments	0%	70%	Medium to Low
Government Securities issued by Central &/or State Govt & other fixed income/ debt securities* including but not limited to Corporate bonds and securitized debt	30%	100%	Medium to Low

*Debt Securities will also include Securitised Debt, which may go up to 75% of the portfolio. Average maturity of the securities will be in line with the maturity profile of the scheme.

In terms of SEBI /IMD/Circular No. 12/147132/08 dated December 11, 2008, the scheme shall invest only in such securities which mature on or before the date of the maturity of the scheme.

Under the Scheme investment managers would have the flexibility to invest the debt component into floating rate debt securities in order to reduce the impact of rising interest rates in the economy. Derivatives may be used to create synthetic fixed rate bond/ floating rate bonds.

The above is only indicative and the AMC reserves the right to change the above pattern in the interest of the investors depending on the market conditions for a short-term period of defensive consideration. In case of deviation, if any, from the asset allocation pattern, the AMC will endeavor to rebalance within a period of 90 days.

Duration: 504 days from the date of allotment of units. However if the maturity date falls on a non working day, the succeeding working day shall be considered for the purpose of maturity of the scheme.

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

i) Schemes investing in Bonds:

Interest Rate Risk: As with all debt securities, changes in interest rates will affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.

Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value.

Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security).

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested.

(ii) Risks associated with Investing in Derivatives

- Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

(iii) Risks associated with Investing in Securitised Debt

As with any other debt instrument, investments in Securitised Debt has Credit Risk, Liquidity Risk, Price Risk / Interest Rate Risk.

Specific Risk Factors - Credit And Rating Downgrade Risk, Prepayment And Foreclosures Risk for Senior PTC Series, Prepayment And Foreclosures Risk for Senior PTC Series, Servicing Agent Risk, Co-mingling Risk, Bankruptcy of the Seller.

(iv) Risks associated with Listing of Units

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment
